

Postdoctoral Training in Neurodevelopmental Disabilities Research

Funded by a T32 Award from the National Institute of Neurological Disorders and Stroke (NINDS), this 2-year program is integrated into the District of Columbia Intellectual and Developmental Disabilities Resource Center (DC-IDDRC) at the Children's Research Institute of Children's National Hospital in Washington, D.C.

Individualized training in:

- Methodology
- Applied biostatistics
- Career development
- Grantsmanship

Join leaders in
improving
children's
health

Train to be the next generation of
multidisciplinary collaborators

We are accepting applications for as early as July 1, 2021. Applications should include: 1) CV, 2) cover letter and 3) letter of reference from your primary mentor. Applications will be accepted on a rolling basis; however, final decisions are anticipated by June 2021.

Eligibility:

- U.S. Citizen or Permanent Resident by date of award
- Advanced degree completed by start date for postdoctoral traineeship (PhD, MD or equivalent)
- Commitment to a research career in Neurodevelopmental Disabilities

Please direct information requests and all application materials to:

Tarik Haydar thaydar@childrensnational.org
Madison Berl mberl@childrensnational.org

Core curriculum:

- Subject matter expertise
- Research and quantitative skills
- Communication and writing skills

Customized & experiential components:

- Cross-training rotation (e.g. bench researchers rotate in clinic)
- Discussion group with NDD leaders
- Community experience

Primary mentors span bench and clinical research in autism, epilepsy, brain injury, genetic disorders, and other NDDs
